- » 4 watt power
- » 40 channels, 27 MHz

#### Signal processing

- » Advanced Noise Limiting (NL) circuitry
- » Optimised automatic gain control

#### Privacy

- » Up to 10 private channels  
(GME programmable option only)

#### Scanning

- » Channel scanning with memory
- » Priority channel with dual watch

#### User controls and interface

- » Rear mounting mic option
- » Front facing speaker
- » New hand microphone
- » Rotary channel, volume and squelch control
- » Graphic signal strength indicator
- » LCD dimmer for day/night use

The new TX2720 is a 4 watt DIN size 27 MHz AM CB radio with improved performance through improvements to the transmitter and receiver.

This new model has had a significant mechanical design change to match the TX4500 and now comes with the MC516B hand microphone and flush mount kit for standard DIN size mount.
